In Energy Vault's second deployment, it will supply Energie Wettingen, an independent public utility northwest of Zurich, with an 8 MW / 16 MWh B-VAULT FlexGrid system designed for ...

The new professorship "Electrical Energy Storage Systems" seeks to develop advanced storage technologies that will enable a reliable and sustainable energy supply. On the one hand, we need ...

With its hydroelectric power plants in the Alps and innovative projects, Switzerland is contributing to the search for solutions for the efficient, long-term storage of electricity.

Requiring no upfront capital investment, BESS-as-a-Service enables companies spanning a wide range of industries - from data centers to transport and logistics to commercial buildings - to benefit from ...

Switzerland's new EUR2 billion energy storage initiative isn't just another infrastructure project - it's a moonshot combining hydropower tradition with cutting-edge tech. Let's unpack why this ...

This article explores cutting-edge storage solutions reshaping grid stability while addressing renewable energy intermittency - a challenge affecting solar, wind, and hydroelectric systems alike.

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland from 20MW to 28MW, making it the country's ...

For the first time, a pilot project called Alacaes is developing a new system that stores electricity in the form of compressed air in the Swiss Alps, with the support of the Swiss Energy Ministry.

With the Zurich Energy Storage Project 2024, the country takes another leap toward achieving its 2050 net-zero targets. This project focuses on large-scale battery storage systems designed to balance ...
