---

A new and sizeable logistic center just six kilometers outside Gothenburg, Sweden, will soon become home to the largest roof-top solar system ever established in the Nordics.

Organic photovoltaic (OPV) technology is a new frontier in solar innovation, and Gothenburg has been a pioneering city in its research and application. OPV cells are flexible and can ...

The finished 52.36 kWp system with 119 panels now offsets 22,754 kg of carbon annually. Delivered on budget and on schedule, novotegra"s mounting technology proved perfect for the demanding ...

Sweden is no exception to this phenomenon, and the city of Gothenburg has become a hub for innovative solar cell technology. In this blog post, we will dive into the world of Solar cells ...

Scientists approximate which solar-powered methods develop about 20 to help 25 moments fewer pollution levels in comparison with guess fuels. The following ecological advantage ...

Säve Nursery north of Gothenburg is the first in the country to install a floating solar farm. The system has been developed by start-up Sunsurf Solar, which is part of Innovatum Science ...

Uranus (2.6 m (8 ft 6 in) in diameter) was vandalized and the new model was reconstructed behind Stora magasinet in Lövstabruk in 2012. It is an outdoor model made of blue steel bars.

Novar, a provider of sustainable energy systems, has expanded to Sweden. The Dutch company has set up in Gothenburg, where there is big demand for green energy. The company is a ...

The bodies represented in this model include the Sun, the planets (and some of their moons), dwarf planets and many types of small bodies (comets, asteroids, trans-Neptunians, etc.), as well as some abstract concepts (like the Termination Shock zone). Because of the existence of many small bodies in the real Solar System, the model can always be further increased.
