Discover Wärtilä"s Alternative Maritime Power solutions for container ships, cruise ships, RoRo cargo ships, LNG carriers, tankers, and other vessels.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

This ambitious endeavor transforms a standard 20-foot shipping container into a high-capacity, modular, and off-grid power system capable of supporting diverse energy needs.

With these industrial power inverters, you can connect the ships to the electrical grid at ports and turn off their diesel generators during their stop. It reduces fuel consumption, emissions ...

Designed for outdoor deployment, the cabinet features weather-resistant construction, efficient ventilation or air conditioning, and options for battery and DC distribution integration. With robust ...

Explore the latest solar off grid inverter cabinet to optimize energy efficiency and minimize cost. Improve one"s enterprise"s sustainability with technology designed for seamless integration and unwavering ...

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.

When using drive technology in a shore-supply solution, ships can source clean energy from local grids. The ship"s main generators can be switched off completely to prevent unnecessary local NOx and ...

A marine-grade power inverter converts 12V or 24V DC from a marine battery bank into household AC power to run TVs, laptops, cooking appliances, and more. The models below are ...

Power Conversion has an industry-leading, complete range of electric ship technologies for a total electric ship

Off-grid inverter cabinets for ships

solution, and decades of naval sector experience with 13 different navies around the world.
