Battery Design Studio[®] is a unique tool that allows engineers to design battery cells, simulate performance, and analyse data from both simulation and test work.

Starting out in Battery Design? Check out Battery Basics as this will walk you through from chemistry to pack. More advanced and you want to dive into a particular aspect of the design the A to Z lists all of ...

Battery Management Studio (bqStudio) offers a full suite of robust tools to assist with the process of evaluating, designing with, configuring, testing, or otherwise utilizing TI Battery ...

Simscape Battery provides comprehensive pack structure definition capabilities, enabling designers to establish pack configurations with minimal code requirements while generating ...

Design custom battery packs with ease! Create packs using new or existing lithium cells, adjust capacity & voltage, and visualize your configuration instantly. Perfect for DIYers, engineers, and battery ...

Enhance battery development testing procedures with battery pack modeling, simulation, configuration, and battery cell selection.

Simcenter Battery Design Studio supports engineers in digitally validate Li-ion cell design thanks to details geometrical cell specifications and cell performance simulation. Extensive components of a ...

In the program it is possible to specify in detail the characteristics of individual battery cells. The software includes an extensive library of battery cells with material properties, which is essential for the design ...

Atmel AVR Battery Studio 2 is the front-end to the Atmel battery management development tools. Together, AVR Battery Studio and the tools support the development, test and manufacturing ...

Create battery pack models in minutes - all cell types, including cooling, customizable. The Batemo Pack
