Scaling up pumped-storage hydroelectric power systems, alongside wind, solar and batteries (SWB), could boost the country's energy equation away from coal, enhance the grid and the...

From the blustery ridges of Ilocos Norte to the coastal corridors of Guimaras, the potential is immense. However, the future of wind energy in the Philippines rests on the nation's ability to transform these ...

MANILA -- The Department of Energy (DOE) on Wednesday released the Terms of Reference (TOR) for the fourth round of the Green Energy Auction (GEA-4), bidding a total of 10,478 ...

While renewable energy sources like solar and wind are expanding, energy storage power stations remain underdeveloped. Let's dive into the roadblocks hindering progress and the potential pathways ...

As of September 2025, the Olongapo facility is reported to be 95% complete and is entering the final stage of testing and commissioning, aligned with the target for the close of the third quarter....

Summary: The Philippines is rapidly emerging as a hotspot for renewable energy development, driven by its abundant wind, solar, and energy storage potential. This article explores current projects, ...

The Board of Investments (BOI) in the Philippines has given a "green lane certificate" for a solar and storage project said to be the largest in the world, enabling it to proceed at a quicker pace.

These include 14 new projects and three amendments, featuring technologies such as wind, solar, hydro, geothermal, and battery energy storage systems (BESS). Of the 17 projects, 15 ...

Given the limited scale of solar in the Philippines, it is perhaps surprising that there are plans to develop one of the world's biggest combined PV and energy storage projects in the country.

Philippines wind and solar energy storage power station

Meralco PowerGen Corp. (MGen) said Thursday that both parties are keen to also develop wind and energy storage systems (ESS) in the Philippines.
