We are specialized in designing, manufacturing as well as providing services for Laser processing machines and whole equipments for Solar PV production line. We offer complete solutions with Laser ...

Our fully automated production line is responsible for building each bespoke PV panel on a turnkey basis, automating the entire process from scribing, welding, laying to labelling

PP hollow corrugated sheet extrusion machine can produce the sheet with the width of 1220-2800 mm.

It specializes in producing lightweight, high-strength PP hollow boards (corrugated boards/grid boards) with hollow grid structures, supporting customization of thickness, width and functional properties ...

In order to avoid customers' worry about whether the hollow board they buy meets their own requirements in the process of purchasing hollow board, we now launch a free sample delivery ...

The production line is programmed by a German Siemens PLC and is equipped with a rich human-machine interface. All process parameters can be easily set and displayed through the touch ...

Our automated Solar/PV modules production line includes a complete set of equipment, such as solar cells laser cutting, string soldering, welding, glass loading, layup, ...

A PP hollow board extrusion line comprises interconnected components, including an extruder, die head, calibrating unit, haul-off unit, cutting unit, control system, and auxiliary equipment, all ...

Description & Advantage The PC hollow sheet production line/PE hollow sheet production line /PP hollow sheet production line is applicable to produce PC,PP,PE hollow profile board.

To improve production efficiency, our Solar/PV modules production line is equipped with intelligent MES

Photovoltaic hollow board production line

and defects detection systems: EL-VI, Hi-Pot, IV, Calibration, and other testers. Equipment is made ...
