What is a solar PV Grid system?

DESCRIPTION OF SOLAR- PV GRID SYSTEM Photovoltaic (PV) refers to the direct conversion of sunlight into electrical energy. PV finds application in varying fields such as Off-grid domestic,Off-grid non-domestic,grid connected distributed PV and grid-connected centralised PV. The proposed 50Mw AC is a utility scale grid interactive PV plant.

How a grid connected PV system works?

In a large grid connected PV system the array could consist of a number of sub-arrays. A sub-array comprises a number of parallel strings of PV modules. The sub-array is installed in parallel with other sub-arrays to form the full array. The effect of this is to decrease the potential fault current through different parts of the system. array.
