This manual provides comprehensive guidelines for the safe and efficient Unloading and storage of solar photovoltaic (PV) modules manufactured and supplied by JAKSON Engineers Limited.

In the process of loading and unloading, except for the forklift operator, all others must keep a safe distance from the range to ensure the safety of personnel. During loading and unloading, special ...

When someone is required to direct the hoisting box to fall during unloading, it shall be kept as flat as possible to avoid collision and throwing of the module box, and the ground shall be flat (Figure 8).

Since building-integrated photovoltaic (BIPV) modules are typically installed during, not after, the construction phase, BIPVs have a profound impact compared to conventional building-applied ...

This short video explains best practices for loading, banding, and unloading solar modules with your PVpallet Series X. Note that banding is always necessary to properly secure your PV...

Figure 2. Pictures of PV module transportation, loading and unloading placement: a) Hi-MO 5 product is loaded into the container in the factory, with a forklift ...

To ensure the safety of unloading of PV modules, please read this manual carefully. In the process of unloading, the forklift should be selected reasonably according to the size and weight of the goods.

Unpacking of PV modules should always be done in the vertical manner by two persons as shown in the diagram. Also care should be taken for falling over one module to the other inside the packing box.

This video offers an exclusive insights into the process of unloading photovoltaic piers, showcasing the initial steps in setting up solar energy systems.

Photovoltaic panel unloading process diagram

This guide serves as a reference for inspecting, transporting, unpacking, handling and storing LONGi PV solar modules to ensure safe practices for you and the modules.
