President Biden signed the Inflation Reduction Act into law on Tuesday, August 16, 2022. One of the many things this act accomplishes is the expansion of the Federal Tax Credit for Solar ...

For example, roof trusses and traditional shingles that support solar panels don't qualify, but solar roofing tiles and solar shingles do because they generate clean energy.

The federal solar energy credit is a tax credit that can be claimed on federal income taxes for both individuals and corporations. The credit was recently extended and increased starting FY2023.

The solar tax credit has a long bipartisan history, originally signed into law by President George W. Bush in 2005, extended by President Obama in 2008, extended again by President ...

The Residential Clean Energy Credit allows you to claim a deduction for the cost of new clean energy property, including solar panels. The credit for solar upgrades was extended through ...

The Inflation Reduction Act has extended the 30% solar tax credit to 2032. Here's what that means and how to take advantage of it.

Since the ITC was enacted in 2006, the U.S. solar industry has grown by more than 200x. SEIA has successfully advocated for multiple extensions of this critical tax credit, including successful passage ...

It was extended as part of the Emergency Economic Stabilization Act of 2008 and the Consolidated Appropriations Act of 2016, which pushed its expiration date to 2022.

The solar tax credit has a long bipartisan history, originally ...

If you install solar energy equipment in your residence before the end of 2025, you're entitled to a nonrefundable credit off your federal income taxes equal to 30 percent of eligible expenses.

Photovoltaic panels extended

Some companies offer extended solar panel warranties just for registering your products, while others charge a fee to gain access to the added coverage. If you get any additional coverage ...
