NY SOLAR MAP estimates rooftop and ground mount solar electric potential (PV panels) and connects you to local solar resources.

There are several options for filing solar energy projects at the Department of Buildings. Projects may be filed as part of another New Building or Alteration permit application.

Explore the latest solar market insights and policy updates in all 50 states and Washington, D.C. All market data is current through Q3 2025. California leads as the top solar state. With over 54 GW of ...

Enter a state, county, city, or zip code to see a solar estimate for the area, based on the amount of usable sunlight and roof space.

Fight Climate Change· Take Action· No Onboarding Fees

The U.S. Department of Energy defines community solar as any solar project or purchasing program, within a geographic area, in which the benefits flow to multiple customers such as individuals, ...

IBEW Third District Solar Map This map displays the solar projects that will be operational in the next few years. Expand the map to filter by the year.

Community solar: Renters, homeowners, businesses, and other customers can tap into solar power generated in New York State without installing panels through community solar.

It includes corresponding PV facility information, including panel type, site type, and initial year of operation.

That's why we work with local contractors to design and install solar photovoltaic (PV) systems at no cost to income-qualified District homeowners. Save money while reducing your carbon footprint.

Photovoltaic panels in the third district

DOEE is partnering with organizations across the District to install solar on single family homes and develop community solar projects to benefit renters and residents in multi-family buildings.
