Who is a full service computer rack provider?

We are a full service industrial computer rack provider. To simplify designing the perfect rack for the job, give us a call and allow us to quote a custom rack for you. Computer racks for your industrial servers and rackmounted computers at SuperLogics. Our 19 racks hold 21 spaces and more for all your rack mounted gear.

What is a server rack unit?

The front and back of server racks have either square, round or threaded holes that are used to secure equipment. A "rack unit" or "U space" is 1.75 inches of vertical space on a rack which contains three holes. It's an easy way to measure space taken up by equipment and helps standardize sizing in the industry.

Are server racks lockable?

Most enclosed server racks are lockable, limiting intentional or accidental tampering with your IT equipment. On top of that, most of the hardware is covered by metal, giving a unified and finished appearance that fits into a professional environment.

Are enclosed server racks PCI DSS compliant?

Enclosed server racks don't just sit on the floor, they are also commonly found mounted to walls or carried in transport cases. They range from 6U to 48U. Some enclosed racks have optional front/back openings, and serve as open frame rack hybrids. RackSolutions offers single and double lock, PCI DSS compliant server racks.
