China's largest offshore solar-hydrogen farm, located in Rudong County, has officially begun operations, marking a milestone in sustainable energy development.

On December 31, 2024, the Rudong Integrated Photovoltaic (PV)-hydrogen-storage Project, operated by CHN Energy's Guohua Energy Investment Co., Ltd. was successfully connected ...

At the end of 2023, the distributed photovoltaic power station of the China Northern Rare Earth (CNREG) smelting branch, constructed by RAMBO Power, a division of Runergy, was officially ...

In the past, its wealth came from the fertile soil the river deposited, but now, the county has a new calling card: solar power.

What follows are the top 10 solar power plants that are actually operational and verifiably producing power as of 2025. No speculative or half-built megaprojects and planned expansions. ...

Once fully operational in 2025, the project is expected to generate an average of 468 million kilowatt-hours of electricity annually, equivalent to saving approximately 151,000 tonnes of ...

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

(Yicai Global) Oct. 11 -- Runjian's shares surged by the daily limit after the Chinese operator of communications and energy networks set out plans to invest CNY1.8 billion (USD281 million) ...

Shanxi Yangcheng Runcheng solar farm is a solar photovoltaic (PV) farm in pre-construction in Runcheng Town, Yangcheng, Jincheng, Shanxi, China.

Electricity generation from solar, measured in terawatt-hours.
