Construction has begun on a solar-plus-storage project on the Caribbean island of St. Kitts & Nevis, backed by Leclanch& #233;, Solrid and MPC Energy Solutions.

High energy costs and severe weather create a unique demand in the Caribbean. Learn why manufacturing climate-resilient solar modules locally is a profitable opportunity.

Upon completion, the St. Kitts project will be the largest solar generation and energy storage system in the Caribbean and a model for other island nations worldwide.

With the project's completion, Leclanché will have enabled St. Kitts and Nevis to be in the global top tier of countries utilising renewable energy with over 30% penetration.

EcoDirect designs and supplies solar + battery projects in St Kitts & Nevis. Our team has the tools and experience to get your next project designed and delivered.

To enable residential grid-tied solar PV systems, the current National Energy Policy is sufficient (although dated) but the associated Action Plan requires implementation of which many of the ...

The largest solar generation plus energy storage project ever to be built in the Caribbean has been announced and is in the final stages of approval by the Government of St. Kitts and Nevis.

Solar has a powerful impact. Generate your own clean energy, reduce your monthly electricity bills, protect yourself from rate hikes and use those savings to empower your life.

The largest solar generation plus energy storage project ever to be built in the Caribbean has been announced by the Government of St. Kitts and Nevis, the state-owned St. Kitts Electric Company ...

Saint Kitts and Nevis Flat-top solar Container

The Project, scheduled for completion in 2025, will provide Saint Kitts with 35.7 MW of solar capacity and 43.6 MWh of battery storage for the delivery of clean, renewable, and reliable ...
