Its AlumiFlex[®] construction ensures exceptional durability in corrosive environments like offshore oil platforms, while the NEMA 4X rating guarantees resistance to harsh weather, including heavy rain and ice.

The Z4-Series SeismicFrame[®] Cabinet System delivers robust seismic protection for critical infrastructure in Zone 4 seismic zones, meeting Telcordia GR-63-CORE requirements.

Telecommunications companies rely on custom and standard NEMA-rated electrical boxes to protect their sensitive equipment. Custom enclosures are often needed because installers constantly struggle to adapt off ...

AZE's weatherproof Outdoor Enclosures provide durable, corrosion-resistant protection for energy, telecom, and industrial applications. Customizable, NEMA-rated, and built for harsh environments.

Designed to save deployment cost and time, our innovative solutions include hub collapse, battery backup, composite mounting platforms and modular series cabinets.

Our NEMA-rated cabinets are built to withstand whatever nature delivers. Each weatherproof outdoor enclosure is rated NEMA Type 3, 4, 5, or 6 and undergoes rigorous field testing to ensure reliability in demanding ...

Protect equipment in any environment, regardless of geographic location. The use of seismic-rated enclosures is recommended in areas where earthquake activity or excessive vibration is possible.

Protect telecom power systems from earthquakes by using cost-effective methods like steel braces and shear walls. These solutions help prevent damage and ensure operational continuity.

Outdoor Cabinets Charles Universal Broadband Enclosures (CUBE) are constructed to withstand the elements and provide superior protection for active electronics in all environments.

Seismic-resistant outdoor telecom cabinet for panama oil platforms

For Optical Distribution Frame installations, DCX Seismic Cabinets are fully configurable, front-access cabinets that serve as a high-density fiber interconnect or the main building block for a large fiber cross connect.
