Selective investments in renewable generation and storage systems, combined with our power trading and sales expertise, allow us to create more value with less emissions.

In support of this challenge, PNNL is applying its rich history of battery research and development to provide DOE and industry with a guide to current energy storage costs and performance metrics for various ...

The National Renewable Energy Laboratory (NREL) has released its annual cost breakdown of installed solar photovoltaic (PV) and battery storage systems.

Each year, the U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. solar photovoltaic (PV) systems to develop cost benchmarks.

We help give you more control over your energy costs by reducing or eliminating your dependence on the grid. In turn, you can manage costs, generate net-new cleaner power, and protect against outages.

Explore Shell's strategic investments and partnerships driving the energy transition. Learn about their advancements in renewable energy and energy storage solutions.

Estimates the energy production and cost of energy of grid-connected photovoltaic (PV) energy systems throughout the world. It allows homeowners, small building owners, installers and manufacturers to easily ...

NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost ...

We show bottom-up manufacturing analyses for modules, inverters, and energy storage components, and we model unique costs related to community solar installations. We also account for PV manufacturing tax ...
