This device adopts 15W monocrystalline silicon solar cell panel (35cm*30cm) and 220V, 80W solar simulation light to simulate light source. It Adopts dual system charge and discharge controller with ...

The training device are specially designed to meet the experimental teaching requirements of solar cell performance testing and photovoltaic application of new energy related majors in ...

Solaronix is helping the photovoltaic industry with the production of specialty materials, the development of new generation solar cell, and the manufacturing of solar simulation equipment.

The training device are specially designed to meet the experimental teaching requirements of solar cell performance testing and photovoltaic application of new energy related majors in higher education ...

Power Conditioning Unit: Serving as the hands-on experimental core, this unit includes diodes, DC and AC loads, a standalone inverter, and a charge controller. Integrated voltmeters, ammeters, and ...

Renewable Energy Lab Equipment contains photovoltaic training equipment, renewable training equipment, new engery training kit, solar and wind trainer, solar ebergly power generation trainer

To enable advanced experiments with current components from photovoltaic practice, GUNT offers a system consisting of coordinated experimental components.

Students will make solar panels, controllers, inverters, and battery are combined to form a solar photovoltaic power generation system. And offers a variety of applications load test: inductive, ...

Portable Solar Power Generation Training Box The DLXNY-ST03 portable solar power generation training box is made up of a case that contains a photovoltaic power supply device, solar power ...

Solar Photovoltaic Power Generation Experimental Equipment
