-----

Investigations have revealed that certain Chinese-made solar inverters and batteries contain undocumented communication modules, including cellular-like mechanisms.

US energy officials are reassessing the security risks posed by Chinese-made power inverters and batteries--key components in renewable energy infrastructure--following the discovery ...

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by U.S experts who strip down equipment hooked up to ...

Recent investigative reports have uncovered concerns in the renewable energy sector: rogue communication devices found embedded within solar power inverters and batteries, many of ...

U.S. government analysis of Chinese-made inverters has found "no definitive evidence" of malicious wireless functions, according to a report seen by pv magazine examining the scope of ...

In May of 2025, U.S. experts found undocumented communication modules and secret radios embedded in some Chinese-manufactured solar inverters and battery systems.

In a plot twist worthy of a techno-thriller, U.S. energy officials have uncovered rogue communication devices embedded within Chinese-manufactured solar power inverters.

The increasing reliance on renewable energy sources, particularly solar power, has brought a critical vulnerability into sharp focus: the widespread use of Chinese-made solar inverters ...

In May, Reuters reported the discovery of rogue communication devices embedded within Chinese-manufactured solar power inverters, prompting governments worldwide to evaluate the ...

Experts uncover rogue devices in Chinese-made inverters and batteries, prompting U.S. and EU nations to
