It is convenient for students to conduct various tests related to solar energy. The product consists of a training model and a test box, modular design, and an simulation light source. Experiments can also ...

Portable Solar Power Generation Training Box The DLXNY-ST03 portable solar power generation training box is made up of a case that contains a photovoltaic power supply device, solar power ...

Renewable Energy Lab Equipment contains photovoltaic training equipment, renewable training equipment, new engery training kit, solar and wind trainer, solar ebergry power generation trainer

Complete Experiment Kit: Comes with all necessary components for a comprehensive solar energy experiment, including solar panel, wind blade, connecting cables, and base.

The DLXNY-ST03 Portable solar power generation test box is a solar photovoltaic power supply system, which can provide a practical teaching, testing, demonstration platform for work principle of solar ...

This renewable energy training system new energy training equipment solar energy products device adopts 15W monocrystalline silicon solar cell panel (35cm*30cm) and 220V, 80W solar simulation ...

It consists of solar panels, batteries, solar controllers, inverters, loads, etc. It has a modular structure design, and the electrical test points are all connected to the experimental wires with safe ...

GL-GF-XS Solar Photovoltaic Cell Experiment Box. This Solar Photovoltaic Cell Experiment Box mainly studies the electrical and optical properties of solar cells and measures the two properties.
