Explore the Ivanpah Solar Electric Generating System with aerial photographs. Discover insights into its impact on the renewable energy field and future plans for the facility.

From a distance, the Ivanpah solar plant looks like a shimmering lake in the Mojave Desert. Up close, it's a vast alien-like installation of hundreds of thousand of mirrors pointed at three...

How Arizona's Mesquite Solar complex became one of the nation's largest solar sites and what its growth reveals about the evolving U.S. clean-energy landscape.

A solar giant in the Abu Dhabi desert The project, called Khazna Solar PV, is taking shape on roughly 90 square kilometres of desert near Abu Dhabi. The site is being developed by a trio of ...

And as it happens, the Mojave is the location of a large new solar power plant integrated with battery storage. The Edwards Sanborn Solar and Energy Storage project incorporates the ...

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada.

Discover how Morocco is becoming a global leader in renewable energy with its ambitious New Energy Strategy, spearheaded by the construction of the Noor Ouarzazate Solar Power Plant. ...

The Ivanpah Solar Electric Generating System is a 386-megawatt project consisting of three solar concentrating thermal power plants located in the Mojave Desert in San Bernardino County. The ...

Rising 450 feet above the California Desert, Ivanpah is the world's largest concentrating solar power facility.

What was once the largest solar power plant of its type in the world appears headed for closure just 11 years after opening.
