US wholesale energy provider Southern Power is adding battery energy storage to two solar sites in California.

Southern Power, a leading U.S. wholesale energy provider and subsidiary of Southern Company, has been awarded a 20-year power purchase agreement by Southern California Edison to add a battery ...

By integrating diverse energy storage technologies, Southern Energy Storage plays a pivotal role in mitigating the intermittency of renewable energy sources such as solar and wind.

SO's unit will build Alabama's first utility-scale BESS at the former Plant Gorgas site, starting in 2025 and completing by 2027, enhancing grid stability and clean energy.

With the capacity to store 150 MW of electricity, the facility will have the power to meet the needs of approximately 9,000 homes. This scale of storage will allow SO's unit to better manage the...

Some say this is a glimpse into the future of clean energy. This large lithium-ion battery storage facility is a result of a collaboration between Southern California Edison and Tesla, the ...

Southern Company's energy storage solutions are making such hybrid landscapes possible. As America's third-largest utility provider, they're deploying storage systems that behave like Swiss ...

Southern Company's subsidiary Alabama Power is building the US state's first utility-scale battery storage system (BESS) on a retired power plant site. The seven-acre facility will be built on ...

The battery-based energy storage additions will enhance California's grid reliability by providing SCE and the California ISO (CAISO) with additional flexible resource capacity that will ...

Utility Southern Co's Alabama unit said on Monday it will develop a 150 megawatt (MW) utility-scale battery

Southern energy storage power station

energy storage system (BESS) on the site of its former coal-fired power plant...
