Solar energy is the fastest growing and most affordable source of new electricity in America. As the cost of solar energy systems dropped significantly, more Americans and businesses are taking ...

It was constructed and is operated by First Solar, who began the project in 2014 after acquiring it from K Road Power Holdings, LLC. The project, which became operational in 2017, provided 115 jobs to tribal and other ...

The South Cheyenne Solar Facility is Southern Power's first solar energy facility in Wyoming. It will deliver energy to a data center in Cheyenne, Wyoming. The project cost over \$300 million and employed ...

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated monthly.

In this article, we'll explore how solar power is faring in the southern United States, the challenges and opportunities it faces, and the future outlook for solar energy in the region.

This project, Southern Power's 30th solar facility, is Southern Power's first solar facility in Wyoming, and it contributes to the company's growing fleet of clean energy resources from California to Maine.

With the Las Vegas skyline in the background, the NV Energy-owned 15-megawatt Nellis Solar Array 2 project is one of more than two dozen solar projects to meet the energy needs of NV Energy customers.

NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost ...

Imagine a home or business where solar panels capture energy, intelligent batteries store and manage electricity, and your entire property becomes a smart, responsive energy environment.
