---

EEC is implementing a rural electrification project powered by solar energy to provide electricity to remote communities in Eswatini, starting with the Mbelebeleni community.

The Sigcineni Off-Grid Solution project began as a small-scale off-grid pilot study into the use of solar technology to meet rural electrification objectives, especially as some rural communities ...

The AMP, a four-year programme which started in 2022, aims to support Mvundla and a neighbouring community, Bulimeni, to create small businesses using solar power.

Rural electrification programs are expanding with donor-financed solar mini-grids and public infrastructure projects. With stable sunlight, rising grid prices, and increasing demand in off-grid and ...

Photovoltaic (PV) solar cells are increasingly prominent sources of small-scale electricity production in Eswatini. The government actively encourages the adoption of solar panels in ...

The Project is a stand-alone mini-grid which consists of a centralised 35kW solar PV generation plant complete with 200kWh battery storages system and an AC LV reticulation network designed to ...

Eswatini Energy Regulatory Authority (ESERA) has recently issued an intention to award three 15 MW Solar PV projects to Globeleq/ Sturdee Energy Southern Africa consortium and ACED after a bidding ...

Independent power producer (IPP) Globeleq and its consortium partner, Sturdee Energy Southern Africa, have been selected as the preferred bidder to develop 30 MW of solar projects in the ...

Swaziland's solar off-grid revolution demonstrates how targeted renewable energy solutions can address energy poverty while supporting sustainable development. With continued investment and ...

# Swaziland Rural Solar Power Generation System

The first phase will build upon the already developed 35-kW Solar PV system which currently supplies power to 21 homes and two churches by integrating a productive use of energy ...
