Now free of crippling sanctions, Syria is hoping renewable energy will become more than a patchwork solution.

The power generated by the solar panels provides enough energy to extract water from artesian wells, allowing farmers to irrigate their lands. According to project technician Samer al-Jabli, ...

This white paper outlines a strategic plan for the development of solar farms in Syria following its liberation. The initiative aims to address the nation's energy deficit by leveraging renewable energy ...

Syria has not had more than four hours of state electricity per day for years, as a result of the nearly 14-year civil war that ended with the ouster of former President Bashar Assad in December....

So, I had no choice but to "bite the bullet" and install a solar energy system through a government-backed loan - especially since it's interest-free." This is how Mulham Jaafar, a ...

In February this year, the Aga Khan Foundation in Syria installed solar panels on the roof of the local community centre. Community members established a cooperative, with all 24 ...

Since 2021, the Aga Khan Foundation in Syria has supported over 3,400 households to access solar-powered water pumps. These pumps, which replace diesel generators, are used for ...

This in-depth editorial investigates how solar energy is becoming a national priority in Syria, the motivations behind the move, the challenges on the ground, and what the future may hold.

Syria is working to rebuild its energy sector after years of civil war and crippling sanctions. The country has suffered severe electricity shortages, with only those who can afford them using ...

Solarvance delivers off-grid and hybrid solar systems tailored for challenging environments like Syria. Our

Syrian Solar Orchard Power System

systems offer dust-proof designs, salt resistance for coastal use, and battery options for 24-hour ...
