Electricity Generating Authority of Thailand (EGAT) plans to build three pumped storage power plants (PSPPs) with the use of existing dams. One of these dams is located in the ...

This project aims to serve as an energy storage system to ensure the security of the country's power system and support the transition toward rising renewable energy in the future.

The Electricity Generating Authority of Thailand (EGAT) plans to invest some 90 billion baht to build three pumped-storage hydropower plants, an EGAT deputy governor said.

Egat plans to convert three hydropower dams into giant energy storage facilities, supporting Thailand's renewable energy needs through a 90-billion-baht pumped storage ...

The Electricity Generating Authority of Thailand (Egat) plans to convert three hydropower dams into massive energy storage systems with a 90-billion-baht investment. This effort aims to ...

BANGKOK -- Pumped-storage hydropower plants, which generate electricity with pumped water and can help balance the supply of renewable energy, are expanding across Southeast Asia, where the...

To mitigate the impact of intermittent wind and solar power generation, the Electricity Generating Authority of Thailand (EGAT) plans to invest 90 billion Thai baht (approximately 2.6 ...

The Ministry of Energy and EGAT have reportedly been considering the impact of deploying additional pumped storage hydropower in order to improve grid flexibility.

Egat is conducting a feasibility study at the dams, aiming to adopt a pumped storage hydropower (PSH) system for hydroelectric energy storage, said Tawatchai Sumranwanich, deputy ...

Thailand Hydropower Energy Storage Project

Thailand has announced plans to build three hydropower dams as part of its push towards clean energy, with an investment of 90 billion baht.
