---

The increased solar and energy storage targets could sustain the forecasted electricity demand increase from data centres and EV charging in the coming years.

“This portfolio of projects significantly enhances solar energy and solar energy with battery storage in Thailand, marking a major step forward in the country's goal of achieving carbon ...

The objective of the Project is to promote clean energy generation in Thailand through the development of a portfolio of solar photovoltaic (PV) power plants and the installation of battery ...

LONGi's off-grid photovoltaic power station on Koh Lipe Island in southern Thailand has begun operation, marking the island's shift to a “solar+storage” system, replacing diesel generators

Thailand is rapidly emerging as a leader in Southeast Asia's renewable energy transition, and advanced energy storage systems are at the heart of this transformation. This article explores how cutting-edge ...

The Electricity Generating Authority of Thailand (EGAT) has announced plans to develop three pumped storage power plants (PSPPs) at existing dams in Chaiyaphum, Kanchanaburi, and ...

With ongoing deployment of variable renewable energy technologies, such as solar and wind power, the opportunities for energy storage projects will increase. Long-term plans to liberalise ...

while you're sipping coconut water on a Phuket beach, Thailand's engineers are busy building floating solar islands and next-gen batteries that could power entire cities.

A key project in 2024 was the 24 MW Hydro-Floating Solar Hybrid at Ubol Ratana Dam, Khon Kaen Province operated with the Energy Management System (EMS) and Battery Energy Storage System ...
