Dubai's new CSP plant is designed to collect heat from the sun and store it in molten salt or convert it directly into electricity via a steam generator set - an ideal solution for providing round ...

Stonepeak said the new venture will invest in utility-scale solar, wind and battery energy storage assets across the Gulf Cooperation Council and the broader Middle East.

Explore 10 renewable energy projects in the Middle East, showcasing solar, wind, and battery storage advancements set for 2025. Read more here.

These top 10 wind energy projects highlight the region's shift towards renewable energy and its potential to become a global leader in clean energy production. The Middle East is rapidly ...

ACWA Power will deploy wind energy and battery storage to help power the Middle East and Africa region's "first battery gigafactory."

Masdar and EWEC have begun construction on what they describe as the world's first gigawatt-scale renewable energy project to deliver continuous, round-the-clock power. The ...

Huawei Saudi Arabia's Red Sea Project is making headlines with the construction of the world's largest photovoltaic-energy storage microgrid.

Speakers will examine various storage technologies, from long-duration batteries to advanced grid-scale solutions, and discuss the role they play in stabilizing energy grids and supporting renewable energy ...

A collaboration of NEOM, ACWA Power and Air Products, it combines onshore solar, wind and energy storage, targeting 600 tons of daily green hydrogen output by 2026.

The first wind and solar energy storage power station in the middle east

Located in the Al Khazna area of Abu Dhabi, the United Arab Emirates has broken ground on a record-breaking renewable energy project that integrates a 5.2 GW solar photovoltaic ...
