Can solar panels cause a roof to leak?

The installation of solar panels on your roof can be an exciting time as it means you will be cutting down your energy costs considerably, but doing this will involve drilling holes in your roof, which could beg the question of whether this will cause your roof to leak? There are various reasons your roof could leak after installing solar panels.

How do I prevent a roof leak under solar panels?

Proper installation techniques and regular maintenance are essential to prevent roof leaks under solar panels. Signs of a roof leak under solar panels include water stains, damp odors, water pooling, and decreased energy production.

How do I know if my solar panels are leaking?

Pooling water on the roof or around the solar panels clearly indicates a roof leak. If you observe standing water after rainfall, it's crucial to investigate further and identify the source of the leak. 4. Decreased Energy Production or System Performance A roof leak can also impact the performance of your solar panel system.

What causes a roof leak?

There could be any number of causes for a leak, including damage caused by walking on the roof, dragging solar panels, or having a tile break in the underlayment. These are not issues you can resolve yourself, and since your warranty would cover these issues, your first call should be to your installer.
