Find out how the largest thermal energy storage system supports renewable energy and promotes industrial sustainability in Hungary.

OSLO, Norway, Oct. 9, 2025 /PRNewswire/ -- Kyoto Group today inaugurated its second European Heatcube, the world's largest industrial thermal energy storage system, at KALL Ingredients corn...

Explore how Kyoto Group is revolutionizing industrial energy efficiency in Hungary with Thermal Energy Storage at KALL Ingredients, reducing CO2 emissions and setting new standards for sustainability.

All thermal storage systems operate on one principle: capture heat when supply exceeds demand, release it when needed. The efficiency depends on storage duration (4-100+ hours), ...

Kyoto Group has commissioned a 56 MWh thermal storage unit at KALL Ingredients' corn processing facility in Tiszapáki, Hungary. This is the world's largest industrial thermal energy storage system ...

Thermal energy storage (TES) technology company Kyoto Group's latest project will displace the use of natural gas at a corn processing plant in Hungary, Europe.

Kyoto Group has inaugurated the world's largest thermal energy storage unit, the Heatcube, in Hungary, marking a milestone in industrial decarbonization. This technology promises significant emissions ...

The Kyoto Group has inaugurated the world's largest industrial-scale thermal energy storage facility in Hungary. The project aims to support Europe's energy transition by improving grid stability and ...
