Whether keeping your building cool or trying to add a little protection to rooftop traffic, Sika Roofing has the insulation and roof board products your project needs.

Our expansive selection of rigid insulation board technologies includes XPS, vacuum insulated panels (VIPs), and phenolic foam.

Explore durable roofing insulation materials and systems that provide superior performance and longevity for your home or business.

RAYCORE SIP roof panels and SIP wall panels combine three labor tasks into one smart panel system. This system utilizes conventional proven building materials: premium Douglas fir members, state-of ...

SOPRA-XPS 35 is a rigid thermal insulation board made of extruded polystyrene with shiplap or square edges on all four sides. Ideal for professional waterproofing and roofing applications.

XPS is a thermal insulation board produced from polystyrene in an extrusion process. Due to its special characteristics, it is the ideal solution for inverted ballasted systems and utility roof decks.

Discover the 7 best roof insulation options that maximize solar panel efficiency, extend system lifespan, and boost energy savings. Find the perfect match for your climate and budget.

Q-Carbon has already possessed integrated thermal design and supply capability that encompasses preform, carbon/carbon composites, insulation felt, carbon foil, and thermal field design.

Top off your structure with Thermocore's industry leading roof panels. Pre-cut to your exact specifications with all of the 2x lumber installed, Thermocore roof panels will save you time and labor ...
