The United Arab Emirates has released new details about its planned mission to the main asteroid belt, one that is similar to an ongoing NASA mission.

This research proposes innovative maps to describe the land relative suitability indices for the implementation of solar energy systems (PV and CSP) over the United Arab Emirates.

The United Arab Emirates is building the world's largest solar and battery storage project that will dispatch clean energy 24/7.

Mohammed bin Rashid Al Maktoum Solar Park is a solar park spread over a total area of 77 km (30 sq mi) in Saih Al-Dahal, about 50 km (31 mi) south of the city of Dubai in the United Arab Emirates (UAE). It is one of the world's largest renewable projects based on an independent power producer (IPP) model. Besides solar farms using PV technology, the project includes concentrating solar power

The Mohammed bin Rashid Al Maktoum Solar Park is the largest single-site solar park in the world based on the Independent Power Producer (IPP) model. It has a planned production capacity of ...

The solar project and solar park when completed are expected to slash carbon emissions in Dubai by more than 6.5 million tonnes of harmful CO₂, helping Dubai and the UAE meet their commitment to ...

In October 2021, the UAE announced that it plans to launch an ambitious mission to the asteroid belt in 2028. That mission will visit seven different space rocks, and even land on one of ...

Space Missions, Initiatives and Projects Emirates Mission to the Asteroid Belt Scheduled for launch in 2028

This paper studies the correlation between the number of sunspots observed by the Sharjah Optical Observatory (SOO) and the solar radio bursts observed by the Sharjah Decametric Radio Telescope ...
