Ramón Méndez Galain helped Uruguay decarbonize its grid in just five years, with 98 percent of its energy coming from renewable sources.

Uruguay did what most nations still call impossible: it built a power grid that runs almost entirely on renewables--at half the cost of fossil fuels. The physicist who led that transformation says...

Uruguay's biggest challenge was finding the capital to build their clean energy capacity. For such a small country, relying on government spending would have been untenable.

Held up as a case study for successfully transitioning away from fossil fuels, Uruguay now generates up to 98% of its electricity from renewable energy. The country offers lessons in ...

Although Uruguay has made significant progress toward a renewable energy system, achieving 100% still requires implementing solutions such as energy storage and a greater variety of sources.

Summary: Uruguay's Peso City has launched groundbreaking subsidy policies to accelerate energy storage adoption. This article explores how these incentives work, their impact on renewable energy ...

crippling reliance on fossil fuel imports to powering 98% of its electricity with domestic renewables. This swift, state-led shift brought not only energy security, red.

Green hydrogen production could strengthen Uruguay's Environmental Sustainability and Energy Security scores by diversifying energy generation and enabling large-scale energy storage.

Uruguay is the second country in the world in the share of variable renewable sources of electricity (wind and solar). The energy policy implemented in the country has also become an important ...

Uruguay's pragmatic and nonpartisan quest for renewable energy highlights how even small nations can

Uruguay cracks down on energy storage

achieve rapid decarbonization and economic growth -- offering a powerful ...
