Uruguay, the country of writer Mario Benedetti and soccer player Luis Suárez, has achieved what many countries have pledged for decades: 98% of its grid runs on green energy.

Uruguay did what most nations still call impossible: it built a power grid that runs almost entirely on renewables--at half the cost of fossil fuels. The physicist who led that transformation says...

One such story is unfolding in Uruguay, a small South American country that has quietly become a world leader in renewable energy. In just over a decade, Uruguay went from being almost completely ...

With an electricity mix fed by approximately 94% renewable sources, Uruguay is already a decarbonisation pioneer. But while 46% of those sources are hydropower, 27% comes from the wind ...

Held up as a case study for successfully transitioning away from fossil fuels, Uruguay now generates up to 98% of its electricity from renewable energy. The country offers lessons in ...

Uruguay's pragmatic and nonpartisan quest for renewable energy highlights how even small nations can achieve rapid decarbonization and economic growth -- offering a powerful ...

Uruguay achieved 98% renewable electricity in just 15 years--without subsidies or aid. Discover the strategy behind it, and how EcoSync is applying this model globally.

Uruguay achieved a model energy transition and today generates almost 100% renewable electricity, making it a global example to follow. The small Latin American country ...

Ultimately, they accepted many more offers than initially planned, signing contracts that expanded Uruguay's capacity to generate electricity not by 5%, but by more than 40%.

Uruguay s solar air conditioning self-generated electricity

Towering white wind turbines and glistening solar panels are now as much a part of the iconography of Uruguay as the grass itself, though they began to pop up across the country only in ...
