LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication...

Solar panel systems use electricity, so installers work with energized equipment, risking electrocution. One documented case involved a 27-year-old male (OSHA Accident Report) ...

Europe may be particularly vulnerable, experts say, with most of its solar farms potentially at risk of remote shutdown.

On 12 June 2023, a group of workers was deployed to install solar panels on the rooftop of a building. During the installation, one of the workers noticed an exposed cable arcing and emitting smoke.

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found undocumented ...

Abstract: At 5:00 p.m. on June 23, 2022, an employee was working on a roof-mounted solar panel system when he made contact with an energized electrical component.

Discover the alarming presence of hidden kill switches in Chinese-made solar panels sold to the West, raising concerns over potential blackouts and geopolitical tensions. Learn how this ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

The rogue devices, including cellular radios, were discovered in Chinese-made power inverters that are used to connect solar panels and wind turbines to electricity grids across the world, including the UK.

Rogue communication devices have been found in some Chinese solar power inverters and batteries, two

Wangzhuang Photovoltaic Panel Incident

people familiar with the matter told Reuters, raising concerns of potential security risks in...
