When selecting trees that maximize shade while minimizing solar panel shading, consider species such as the Red Maple, Norway Maple, and Eastern Redbud. These varieties can provide ...

Consider these ideal tree placement strategies: Plant deciduous trees on the east and west sides of your property to shade your home during summer mornings and afternoons. Choose ...

When designing a solar panel installation, it is important to select trees that have a smaller mature size and are not likely to grow tall enough to shade the panels. Additionally, trees ...

Planting under or near powerlines can be challenging. Here are some suggestions of some good plants for this location.

Whether working on a community solar garden or 1GW solar array, choosing the right vegetation can mitigate visibility concerns with adjacent landowners, reduce long-term maintenance, ...

Intentional use of targeted plant species will enhance the positive impacts of a solar array for pollinators. When pollinator habitat is a primary goal, planning for these goals in the pre ...

Consider these ideal tree placement strategies: Plant deciduous trees on the east and west sides of your property to shade your home during summer ...

To provide continuous shade or to block heavy winds, use dense evergreen trees or shrubs. In hot climates use native species or drought tolerant trees or shrubs that are adapted to local climate ...

In this blog, we'll explore the advantages of planting trees around solar farms, discuss some regulatory requirements, and recommend some of the tree varieties in stock that are perfect for ...

What trees should be planted under photovoltaic panels

Planting new trees on any property is a great way to beautify. But it can also be a huge hassle for solar arrays. Picking trees does not need to be complicated though. Here's a simple framework you can ...

A solar panel's efficiency depends largely on the availability of sunlight. When plants such as tall trees or overgrown bushes block photovoltaic (PV) panels, the energy output decreases.
