We are a Cape Town-based, company that specialises in commercial and industrial construction. From 2020 onwards we are introducing hybrid wind and solar electric systems.

But working in its favour are firms such as GreenCape and Juwi, which aim to make clean power the norm - here we take a closer look at how they are planning on doing that.

At NxtWind, we take pride in our specialist team of engineers, project managers, and renewable energy professionals who bring extensive experience in wind, solar, and battery storage.

Then, the application of wind solar hybrid systems to generate electricity at communication base stations can effectively improve the comprehensive utilization of wind and solar energy.

Achieve An Autonomous Base Station. The Main Benefits of Our Telecommunication Solution Include Our Telecommunication Solution Also Delivers The Following Advantages Kestrel's telecommunications solution utilises a multiple power source hybrid system to create energy-efficient and autonomous telecommunication base stations. The Kestrel Multiple Power Source Hybrid System uses unique technologies to maximise efficiency and output. Multiple power sources are advantageous, particularly in off-grid systems, a...
