---

Through the implementation of solar energy, Internet of Things (IoT) sensor-actuator networks, and artificial intelligence, an SHG with a low carbon footprint has been designed. The ...

With over 3,000 hours of annual sunlight, Tunisia's agricultural sector is ripe for photovoltaic glass greenhouses. These structures combine crop cultivation with solar energy generation - a dual ...

Historical Data and Forecast of Tunisia Solar Glass Market Revenues & Volume By Greenhouses for the Period 2021-2031 Tunisia Solar Glass Import Export Trade Statistics

As Tunisia accelerates its solar transition, selecting high-performance photovoltaic module glass becomes crucial. From durability enhancements to efficiency breakthroughs, understanding these ...

Thanks to the hybridization of renewable energies, hydroponic techniques, smart technologies, and sustainable practices, this cutting-edge greenhouse creates an ideal microclimate for year-round ...

A new index for the identification of the best glass solutions based on annual average deviation is defined. For all climates, the best glass solutions work better in winter than in summer. ...

This greenhouse features a top covered with hollow solar panels and walls covered with hollow glass, combining the aesthetic appeal of glass greenhouses with the thermal insulation properties of solar ...

This research explores the feasibility of integrating renewable energy sources, such as solar and wind, to power a hydroponic greenhouse. In this way, the latter's energy autonomy is ensured.

Specially designed BiPV solar glass modules for greenhouses, Heliene's Greenhouse Integrated PV (GiPV) modules offer a sustainable alternative with no additional racking or support required.
