Why is it called hypochondria instead of hyperchondria? [closed] Ask Question Asked 5 years, 5 months ago
Modified 5 years, 5 months ago

To bring them the technology they needed, Intel teamed up with PowerCom, a local solar system installer, to design an extremely power efficient solar PC lab. Four solar panels were installed, ...

The solar project, which began in 2020, contributes about 15% of Intel's global, on-site solar photovoltaic electric power capacity. It will also reduce carbon dioxide emissions by about 3,800 tons.

In the sentence "Why is this here?", is "why" an adverb? What part of speech is "why"? I think it modifies the verb "is", so I think it is an adverb.

It is still much too early to determine whether IBM, Intel and HP will be as successful creating a mass market for solar energy on par with what they did for computers.

The grass is wet because it rained last night. This seems the simplest and most elegant expression of the meaning. I am always suspicious of "reason (s)" and "why" being next to each other. There can ...

Why is used here as an interjection. According to Merriam-Webster: --used to express mild surprise, hesitation, approval, disapproval, or impatience <why, here"s what I was looking for> In my ...

8 1) Please tell me why is it like that. [grammatically incorrect unless the punctuation is changed. Please tell me: Why is it like that? The question: "Why is [etc.]" is a question form in ...

Discover the benefits of VPR adoption and why it's key to unlocking the potential of the grid to deliver a reliable, available, and resilient electricity supply for the low-carbon economy of the future.

Why does Intel make photovoltaic panels

At its campuses across the U.S., Europe and Asia, Intel uses energy from the sun to heat and cool its buildings, provide lighting and produce electricity for on-campus use.

Imagine enough solar panels to cover 52 regulation U.S. football fields or 47 full-size soccer fields. The company now estimates it has installed 3 million square feet of solar arrays at Intel ...

"why" can be compared to an old Latin form qui, an ablative form, meaning how. Today "why" is used as a question word to ask the reason or purpose of something. This use might be ...

Imagine enough solar panels to cover 52 regulation U.S. football fields or 47 full-size soccer fields. The company now estimates it has installed 3 million square feet of solar arrays at Intel sites in nine nations.

Intel aims for 100% global renewable electricity, achieved in many large countries and powering over 3.2 million US households per year.

The history told me nothing why an involuntary, extremely painful spasm, is named after a horse called Charley. Charley in the UK is often spelled Charlie, a diminutive of Charles, and it's ...
