Technically, no state outlaws or bans solar panels; quite the opposite. Most states have solar access laws that forbid any agreement, covenant, condition, bylaw, or contract that outlaws or ...

PHILADELPHIA -- The solar power industry is booming and that growth helps the world meet its climate goals by replacing fossil fuels. But an emerging problem in the U.S. solar business ...

Find out if your solar system or panels are covered under your homeowner's insurance policy. Find out if the financing arrangement includes a lien filed against the solar system or panels. These liens, o ...

On the right home, solar panels can substantially reduce monthly electricity bills, but they cost thousands of dollars to set up. If you don't have cash to pay for them and want to take...

Are solar panels worth it for you? SolarReviews reveals 7 common reasons people don't buy solar and helps you decide if solar is a good choice for your home.

Let's go over these incentives that were sold to me as a New Jersey homeowner, how solar salespeople oversell the benefits, and the reality of having a solar panel system.

Whether you choose a credit union loan, bank financing, or solar-specific product, focus on the total cost of ownership rather than just monthly payments. Remember to shop multiple ...

This article will address common concerns and debunk misconceptions surrounding solar panel installations, ultimately highlighting why going solar is a smart choice for homeowners.

Traditional regional banks tend to be skeptical about clean energy projects, which are framed as risky investments that may not yield solid returns. As a result, many banks have little...

Why don't banks install photovoltaic panels

The market for residential solar panels continues to grow, in large part due to declining solar panel costs and increased government incentives, including tax credits.
