Need infographics, animated videos, presentations, data research or social media charts? This chart shows the total global installed power capacity from 2019-2025, by fuel and technology (in...

Annual electricity generation from wind is measured in terawatt-hours (TWh) per year. This includes both onshore and offshore wind sources.

(I:USWEP) Chart data for US Wind Energy Production from 1983 to 2025. Visually compare against similar indicators, plot min/max/average, compute correlations.

Global wind power generation capacity (GW) for 2010-2022 broken down by onshore and offshore. Additional chart showing 2022 market share by region and illustrative map showing historical by country.

You can see bar chart traces of "Top 20 Global Wind Installations by Country" and "Global Wind Installations by Region".

Find maps and charts showing wind energy data and trends.

ISEP Energy Chart provides interactive graphs on Electricity Generation and Demand, Renewable Energy Share in Electricity, Cumulative Installed Capacity (Electricity or Heat), and Bar Chart Race (Solar PV or Wind).

Experience the full journey of wind power generation from 1978 to 2024 through this animated bar chart race.

Variable width (variwide) bar chart (column chart) showing wind and solar energy generated in 15 largest wind+solar generating states in the U.S., showing energy per person (vertical axis) and energy per ...

Wind power generation in the Net Zero Scenario, 2015-2030 - Chart and data by the International Energy Agency.
