Below is the list of the wind farms developed by Cannon Power Corp. (wind farms listed in the database).

In-line degassing system for wind turbine blade casting: efficient epoxy resin degassing with high output, low environmental impact, and compact footprint.

Enter the heavy wind cannon prototype developed by Vortex Energy Solutions in 2023. Unlike their spinning ancestors, these installations resemble industrial-grade air compressors turned inside out.

Looking for tailored wind blade production lines? Contact us today to discuss your specific needs and discover how our custom solutions can enhance your production process.

Cannon Afros, a company of Cannon Group and market leader in high-performance dosing and mixing equipment, has developed an innovative direct infusion system for faster ...

It was a type of gun that would eject a jet of compressed air against enemy aircraft. It consisted of a large angled barrel like a bent arm resting in an immense cradle. The cannon worked by the ignition ...

Cannon Afros, a company of Cannon Group and market leader in high-performance dosing and mixing equipment, has developed an innovative direct infusion system for faster processing of epoxy and ...

As a leading ISP, Cannon Power Services partners with wind project owners to enhance performance, reduce operating costs and increase asset life. We customize our solutions to deliver the right ...

The Wind Cannon (Windkanone) or Whirlwind Cannon (Wirbelwind Kanone) was an unsuccessful anti-aircraft cannon developed in Nazi Germany during World War II. It was one of Adolf Hitler's wonder weapons and aimed to utilise powerful blasts of air to disrupt enemy aircraft. This weapon was developed by Mario Zippermayr, but was different from the vortex cannon he also made.

Wind turbine wind cannon

Cannon's direct infusion process provides an innovative solution for wind turbine blades. Power generated by wind turbines accounts for just over 24% of the world's renewable energy generation ...
